

Simple Design. Improved Productivity.

The 1760 Case Top Sealer is a well tested, efficient design that minimizes overall costs. The 1760 integrates seamlessly with ITW Hartness Case Packers (Models 875, 2800 and 2900) and improves productivity by minimizing downtime from changeovers and maintenance. Light curtains ensure the operator's safety while providing unobstructed views and quick access to the machine. When combined with the included Intelligent Lighting Kit for faster reaction to the machine status, unnecessary downtime is eliminated thus reducing the Total Cost of Ownership.

Key Differentiators

Better Reliability

- Reliable and repeatable changeovers in under 3 minutes
- Minimal box distortion and graphic blemishes
- Lower maintenance and greater uptime

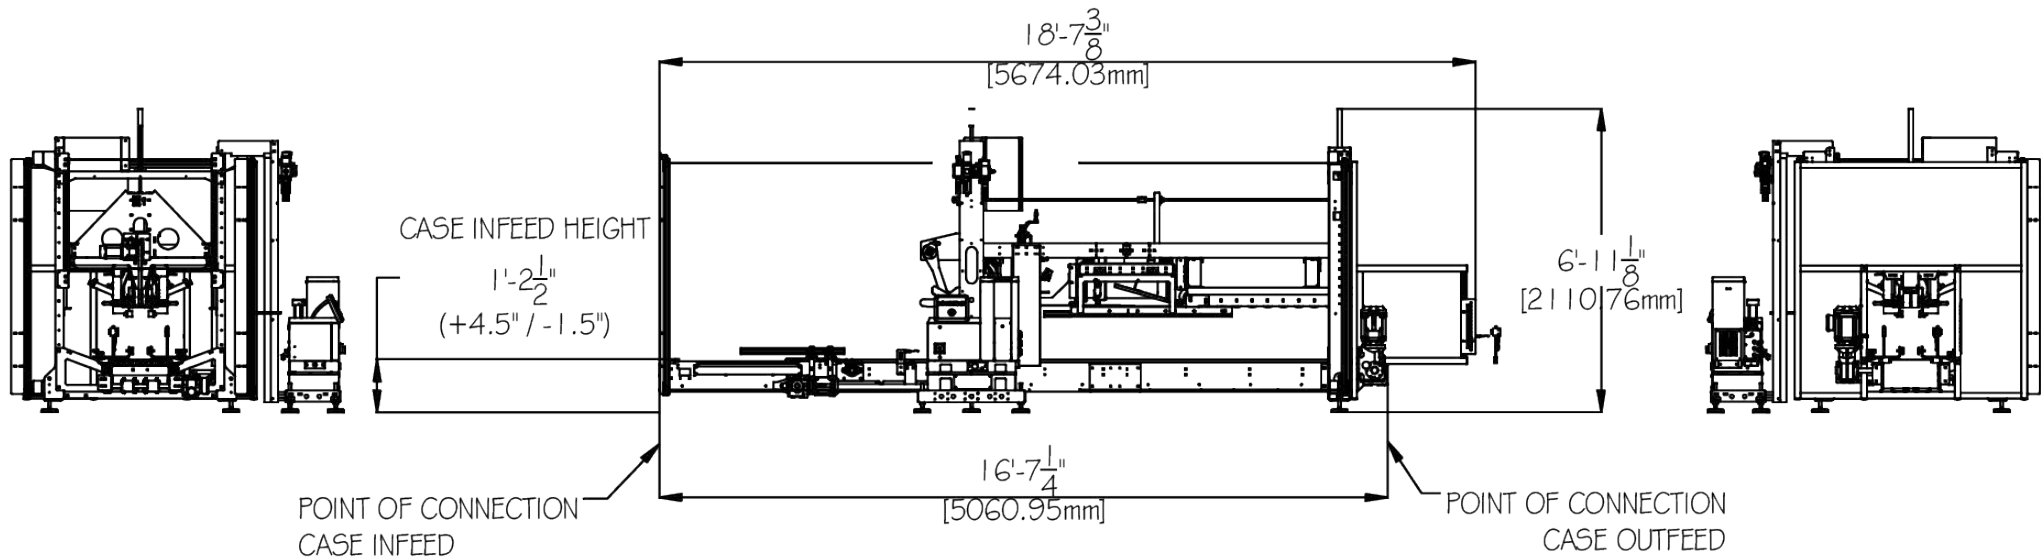

Efficient Operation

- Unhindered access to the machine
- Fast response time to equipment status via Intelligent Lighting Kit
- Light curtains insure operator safety and allow clear view of the operations

Seamless Integration

- An extension of the ITW Hartness Case Packers
- Reduced implementation and capital costs
- Compact footprint saves valuable floor space

1760 Case Top Sealer

Model 1760 Specifications

Compatibility Seamless integration with ITW Hartness Models 875, 2800, and 2900 Case

Machine Size 16'8 (L) x 5' 5" (W) x 6' 8" (H)

Speed New RSC cases up to 60 CPM
RSC Reshippers up to 35 CPM

Case Size 4.5" - 17" (W) and 3" - 17" (H) Sealed Case

Accessibility Open design allows operator unobstructed access to any part of the sealer

Changeovers Reliable, repeatable changeovers in under 3 minutes via hand cranks and precision counters

Options Alternate glue units (Dynatec is the standard), Tape Kit, Reshipper Boxes
