

# New Features

# Top-Load Case Packer

## Machine Status Board

- Product Insights
- Real-time notifications
- Performance Metrics

## Anti-Toppling Adjustment

Easier operator access for vertical adjustment

## Drop-Zone Mirror

Better operator visibility

## Expanded Functional Product Width

Product width capability increased to 21" for 4-6 lanes

## Overhead Wireway

- Located above product
- Reduces risk of cable damage

## Virtual Changeover Guide

Details each changeover step on the HMI screen

## Air Transfer System

New rack & pinion design allows for easier operator access and maintenance

## Adjustable HMI

- Rotates and pivots side-to-side
- Adjustable for various operator heights

Separate and accessible low and high voltage enclosures.

## New Options

**Quick-Adjust Lanes** Utilizes two crank settings to adjust lane spacing, replacing spacer changes and cutting changeover time by up to 50%.

**Parallel Pack** Separates cases into lanes within the machine for side-by-side packing, using less space than traditional methods.

**Machine Status Board** Displays real-time machine data during operation for improved visibility and faster troubleshooting.

## Ready when you are!

Select configurations ship in as little as 12 weeks.

# Top-Load Case Packer

**TW HARTNESS**

864-297-1200 info@hartness.com hartness.com

## Options

- Placehead
- Flap control
- Corrosion resistance
- Intelligent lights

## Model 875

- Low pressure, flexible package handling
- Split infeed conveyor with slow down module
- Compatible with a variety of package types including unconventionally shaped bottles
- Medium speed: up to 30 cycles per minute
- Capable of handling multiple cases per cycle

## Model 2800

- Servo-controlled motion ensures greater accuracy, speed and reduces parts consumption
- Positive placement of pressure sensitive or lightweight products
- High speed: Up to 40 cycles per minute
- Capable of handling multiple cases per cycle

## Equipment Additons

### High-Speed Laners

#### Model 2200

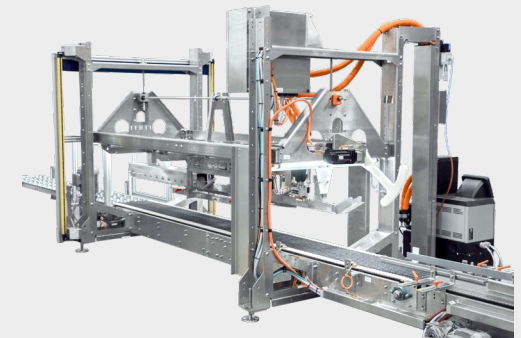

- Servo motor driven lane shifter and chute belts ensure accurate product placement up to 150 fpm
- Option to include in Top-Load Case Packer frame or stand-alone
- Backpressure control for a variety of package types
- Quick, simple changeover

#### Model 2260

- Continuous motion prevents product and label damage and reduces noise
- Reliable performance for a variety of package types up to 200 fpm
- Servo motion control ensures accurate product placement
- Intelligent light kit available
- Quick, simple changeover

### Case Top Sealer

#### Model 1760

- Small footprint
- Light curtains enhance operator safety, ensure visibility, and allow easy machine access
- Minimal package distortion
- Case inspection/reject option
- Intelligent light kit
- Quick, simple changeover
